

Paving Cleaner

Formulated to cling to surfaces and remove mould spores, black spot, lichen, fungus, algae and moss from all types of external natural and artificial stone including concrete paving.

- Ready to Use
- Deep Penetrating Anti-Bacterial Action
- Removes Mould Spores, Black Spot, Lichen & Algae
- Helps Restore Stone & Paving to Original Colour
- External Natural & Artificial Stone, Porcelain & Concrete Paving
- Suitable for Exterior Use, Domestic & Commercial

DESCRIPTION

Formulated to cling to surfaces and remove mould spores, black spot, lichen, fungus, algae and moss from all types of external natural and artificial stone including porcelain and concrete paving. Bleaching action helps restore stone and paving to its original colour. The deep penetrating antibacterial action helps prevent re-growth.

DIRECTIONS

SHAKE WELL BEFORE USE. This product contains bleaching action, if in doubt try on an inconspicuous area before general application. Surfaces to be treated should be completely dry before application.

Mould, Fungus and Algae: Pour solution directly onto the paving and spread out evenly using a sponge or paint brush. Leave for a minimum of 1 hour. Apply a little water and agitate with a stiff deck brush or black emulsifying pad to release residues of mould, fungus and algae from the surface. Rinse thoroughly using a hose or jet wash. Some stubborn stains may require a longer treatment.

Black Spot, Lichen and Moss: Pour solution directly onto the paving and spread out evenly using a sponge or paint brush. Cover with plastic sheeting or tarpaulin and leave overnight. After uncovering, add a little water and gently agitate using a medium brass coated wire brush. Rinse thoroughly using a hose or jet wash. Heavily contaminated surfaces may require more than one application. If small traces of black spot still remain after treatment, it should gradually fade and disappear within a few days following the treatment. If not then re-apply.

Please Note: Keep pets off at all times during treatment. In case of contact with metals, fabrics and painted surfaces rinse with water immediately. Do not use on warm surfaces and do not apply if rain is imminent. Avoid contact with plant life and if contact is made rinse well with plenty of water.

Do not use with other acid based removers.

Always test on an inconspicuous area before application.

SEALING

It is recommended that you seal your recently cleaned surfaces with a suitable ROCATEX sealer as this will help prevent moisture and organic particles from absorbing into the surface, thereby reducing the growth of algae and black spot.

COVERAGE

5-15m² per litre depending on the extent of the soiling.

STORAGE

Store upright in a cool, dry, frost-free environment. Once open use within 6 months.

HEALTH & SAFETY

Contains: <5% anionic surfactants. <5% non-ionic surfactants. <5% sodium hypochlorite.

Ingredients: www.rocatex.co.uk

WARNING

Causes skin irritation. Causes serious eye irritation. Harmful to aquatic life with long lasting effects.

Wash hands thoroughly after handling. Wear protective gloves/protective clothing/eye & face protection.

IF ON SKIN: wash with plenty of water/soap.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

If skin irritation occurs: Get medical advice/attention. Immediately call a POISON CENTRE/doctor. Take off contaminated clothing and wash it before reuse.

Dispose of contents/container to special waste collection point in accordance with local regulations.
